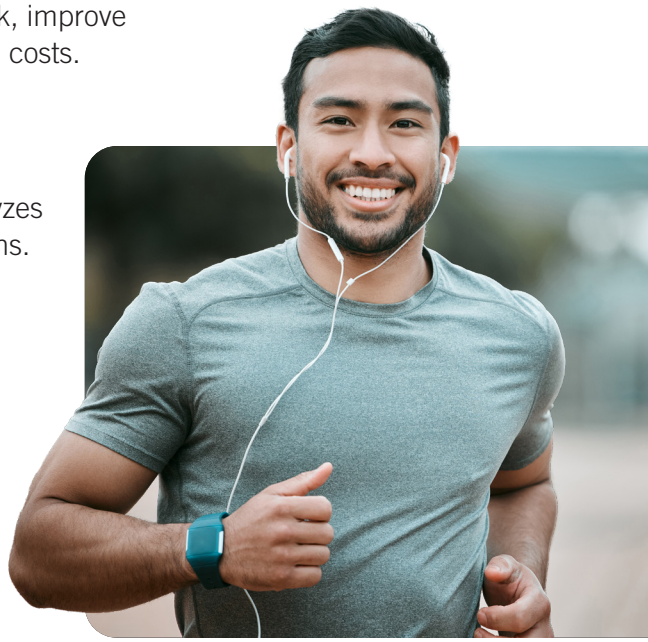
American Health Data Institute

TURNING DATA INTO BOTTOM-LINE RESULTS

Healthy Employees = Lower Healthcare Costs

American Health Data Institute (AHDI) transforms healthcare data into focused cost-containment strategies that help employer groups manage population risk, improve employee health, and realize significant long-term savings on health plan costs.



Patented Process

Developed to integrate with multiple systems, our patented process analyzes complex healthcare information to uncover patterns in insured populations. Once revealed, these trends can be matched to highly effective tools – programs designed to contain costs in specific areas of need.

Proven Results

- ✔ Improves healthcare utilization, reduces claims
- ✔ Manages risk, contains cost
- ✔ Promotes employee health, increases productivity

Bending the Curves

Data is a powerful tool when used to its maximum potential. AHDI specializes in turning data into actionable results to employer groups can realize an upward trend in employee health and a downward curve in health plan spending.

Average AHDI Savings:

11-17%

of total annual healthcare costs

Let AHDI show you how we can help your organization transform healthcare data into health plan savings.
